

CREATING THE PERFECT SMILE

This picture of Candice is one of my favourite over the many years I have worked as a dentist. Candice came to me desperate to improve her smile. She had generally darker teeth and the front teeth were crooked. She was really embarrassed with her smile and conscious when with people. She came to a point in her life when she had to decide between buying a new car or getting her smile transformed. Candice told me that she had been carrying a picture of the actress Martin McCutcheon in her handbag for a year and wanted a smile just like hers!

The pictures say it all. Look at Candice's eyes to see the confidence she now has by having a beautiful and natural smile.

Candice's own words after the treatment: -

"Having my veneers fitted has completely changed my life. It has made me 100% more confident, I no longer feel uncomfortable to smile in photos and am now always happy to smile & laugh when meeting new people. Before I was always so worried people were staring at my teeth and thinking that I was ugly. I cannot tell you how much this feeling knocks your confidence - but I no longer get that! Instead I am now being told how beautiful my teeth are, and people cannot believe it when I tell them they are porcelain veneers as they look so natural!! I am incredibly grateful to Dr. Parmar for the fantastic job he did with my veneers; if anyone is thinking about doing it, I have 3 words for them...go for it!!!"
