

" I have known Ash for over 10 years. As one of the leading cosmetic dental laboratories in the UK, we work for more than fifty clients on a regular basis. I have no doubt in my mind that Ash is the most clinically gifted dentist of the current dentists we work for. His attention to detail is outstanding and our communication skills between him and the laboratory are second to none, I feel that I have learnt more in the last 10 years due to Ash's commitment to the technician/dentist partnership than I would have with any other dentist. We have worked together many times on Smile Design Courses for dentists, with outstanding results every time. His understanding of the patient's requirements is brilliant and without his dedication we could not provide the service and results that we have all become used to. I feel privileged to call Ash my friend, as well as a colleague."

Rob Storrar (Master Ceramist Technician, Amdecc Dental Laboratory)
