COMPREHENSIVE DENTAL ASSESSMENT

Undoubtedly one of the unique benefits of being a patient at Smile Design By Ash is the detailed and thorough initial dental assessment we offer. This offers peace of mind that any potential dental problems are accurately diagnosed and explained to you. Certain things like gum disease and acid erosion of the teeth can go on for many years, without the person being aware that there are any damaging problems actually present.

We offer a basic dental examination and X-rays for patients with few or no dental problems – this is normally adequate. However, if someone is considering cosmetic dentistry, has missing or worn down & damaged teeth, then a detailed dental assessment is required. Our signature 2-hour dental evaluation includes: -

- **Digital Photographs** – Photos of your face, smile and teeth for detailed planning
- **Digital X-Rays** - Assessment of the teeth and the surrounding bone
- **Study Models** - Replica moulds to analyze the teeth and the bite
- **Smile Analysis** - A detailed and unique survey of the smile
- **Oral Cancer Screen** - Review of the soft tissues
- **Bite Assessment** – Using sophisticated computer bite recording equipment called T Scan, we can help patients suffering from headaches and bite related problems

- **Assessment of the teeth and dental restorations** – A complete review of every tooth including the integrity and status of all the fillings
- **Gum Health** - Thorough analysis of the gum health including gum measurements, and a scoring system to measure plaque and bleeding levels (to confirm the level of gum disease)
- **Professional, personalized report** – A detailed report explaining all your treatment options, with estimates

DOING TREATMENT IN STAGES

After the Comprehensive Dental Assessment, getting the gums healthy is a priority. This involves seeing our Hygienist Jessica for one or more treatment sessions. The next stage is to have a healthy foundation for the teeth, by restoring them properly. This is normally followed with any cosmetic treatment that is desired to create an attractive smile to suit the individual. Finally, if there are missing teeth, then implants or other options can be considered. We offer interest free finance plans over 2 years. This makes treatment affordable with only small monthly payments.

SPECIAL OFFER FOR LIFE MAGAZINE READERS

I would like to offer all Life magazine readers (and their family & friends) who wish to have a Comprehensive Dental Assessment a special saving of £100, i.e. the fee will be only £95, rather than the normal fee of £195. This offer will be valid for anyone who books the 2-hour dental assessment appointment by the end of November 2014. You are also welcome to visit our Practice for a FREE INITIAL CONSULTATION to meet our Team and experience our unique and welcoming set-up.

Please phone Dee, our Patient Care Coordinator on **020 85000544**, or visit our informative website www.smiledesignbyash.co.uk to find out more ■
